BDNA BREAKERS + DRILLS

HYUNDAI EVERDIGM

TRAINING & DEVELOPMENT

HYUNDAI EVERDIGM

Skilled operators. Protected investment.

T500ProR

Operator Development & Machine Protection Program

Practical training. Stronger operating habits.

Structured, hands-on development for the Hyundai Everdigm T500ProR top hammer drill rig. Build operator confidence, improve drilling practices and support long-term machine care.

6 TRAINING LEVELS

FLEXIBLE DELIVERY

www.bdna.ca

A pathway for every stage.

From initial machine orientation to advanced operation and internal trainer development.

LEVEL 0 **6 HOURS**

Machine Familiarization

Orientation to the machine, key components and systems. Covers daily walkarounds and basic operation.

Start with machine awareness.

LEVEL 1 **16 HOURS**

Basic Operator

Foundation training for new operators, focused on safety, machine controls and basic operation.

Build sound operating habits.

LEVEL 2 **40 HOURS**

Intermediate Operator

Develop operational proficiency, improve drilling techniques and work toward more efficient operation.

Improve technique and consistency.

LEVEL 3 **40 HOURS**

Expert Operator

Advanced drilling strategies, machine systems awareness and production optimization.

Refine experienced operators' skills.

LEVEL 4 **10 HOURS**

Technical Awareness

Systems overview for senior operators, including hydraulics, pneumatics and electrical basics.

Connect operation with machine care.

LEVEL 5 **30 HOURS**

Train-the-Trainer

Develop internal trainers to support sustainable, consistent training within your organization.

Build capability within your team.

Choose the starting point and combination that fit your operators, equipment and goals.

Choose the right pathway.

Use your operational priority to start the conversation. BDNA can help tailor the training plan.

YOUR PRIORITY	RECOMMENDED PATHWAY
New machine delivery	**Level 0 + Level 1**
New operator onboarding	**Level 1 + Level 2**
Production improvement initiative	**Level 2 + Level 3**
Uptime and machine care initiative	**Level 3 + Level 4**
Internal trainer development	**Level 5**
New operation startup	**Comprehensive program**

What your team gains

Productivity Develop drilling practices that support more efficient performance.

Safer work habits Reinforce risk awareness and sound operating routines.

Asset protection Build machine-care awareness to help reduce avoidable wear and downtime.

Consistent procedures Establish repeatable practices across your operators.

Team development Support progression from new operators to experienced team members.

Built around your operation.

Practical instruction, documented completion and support that extends beyond the classroom.

Included in the program

Classroom instruction

Structured, OEM-based curriculum.

Hands-on practice

Real machine application and operational coaching.

Reference materials

Handouts, inspection sheets and job aids.

Completion documentation

Attendance records, a certificate of course completion, instructor observations and coaching feedback.

Ongoing support

Questions, coaching, refresher options and follow-up recommendations.

Flexible delivery

On-site
At your location.

BDNA facility
At our training centre.

Flexible scheduling
Planned around your operations to minimize disruption.

Comprehensive custom program

Up to two months of custom training built around your goals, equipment and operating environment. Optional follow-up support can include refresher training, new operator onboarding, operational visits, fleet reviews, machine-care coaching and site-specific support.

Course completion, not operator certification. Training documents course completion only. It does not provide legal or regulatory operator certification, replace site-specific competency requirements or supervision, or guarantee production performance. Operational responsibility, regulatory compliance and site-specific competency requirements remain with the employer and/or site owner.

Let's build your training plan.
